Subject: Re: TSBP e-Update

Hello,

I am writing with regard to the agenda for the February 6, 2018 Texas State Board of Pharmacy meeting, specifically, item:

C.3.1.2 Chapter 305 Concerning Educational Requirements (§§305.1-305.2) (Tab 16)

I strongly support the adoption of proven, high-quality standards for pharmacy technician education and training programs that the board is considering in C.3.1.2; Chapter 305.2. However, with regard to the specific language proposed in C.3.1.2 Chapter 305.2, it should be noted that, as of 2015, pharmacy technician education and training programs are accredited jointly by the American Society of Health-System Pharmacists and the Accreditation Council on Pharmacy Education (ASHP/ACPE). As such, I have provided a word document with suggested revisions to the language proposed in 305.2 to be consistent with the language in the accreditation standard (noted in red on the attached document that I revised using the *Track Changes* function in Microsoft Word). I have provided a copy of the ASHP/ACPE Accreditation Standard (rev. 2015) for your reference. Due to a schedule conflict I will be unable to attend the February TSBP meeting, but I am happy to answer any questions you may have by email or by phone at [512-963-8703](tel:512-963-8703). Thank you for all that you do on behalf of the citizens of Texas.

Kind regards,

Lisa

TITLE 22 EXAMINING BOARDS

PART 15 TEXAS STATE BOARD OF PHARMACY

CHAPTER 305 EDUCATIONAL REQUIREMENTS

§305.1 Pharmacy Education Requirements

The minimum standards for the professional practice degree programs of a university, school, or college of pharmacy whose graduates shall be eligible for licensing in this state, shall be the minimum standards required by the Accreditation Council for Pharmacy Education. The universities, schools, and colleges of pharmacy whose professional practice degree programs have been approved by the board shall be published in the minutes of each annual meeting of the board.

§305.2 Pharmacy Technician Training Programs

(a) Purpose. The purpose of this section is to set standards for Board approval of pharmacy technician training programs to ensure that graduates of the programs have the basic knowledge and experience in general pharmacy to practice in most pharmacy settings. Pharmacy technician training programs are not required to be approved by the Board. However, the Board maintains a list of Board-approved pharmacy technician training programs that meet the standards established in this section.

(b) Board-approved pharmacy technician training programs.

(1) The approval by the Board of pharmacy technician training programs do not change any requirements for on-site training required of all pharmacy technicians as outlined in the rules for each class of pharmacy.

(2) The standard for Board-approved pharmacy technician ~~training~~ programs shall be the American Society of Health-System Pharmacists' ~~Accreditation Standard and Accreditation Council on Pharmacy Educations' (ASHP/ACPE) Accreditation Standards~~ for Pharmacy Technician ~~Training~~ Programs ~~which are based on goals specified in ASHP's Model Curriculum for Pharmacy Technician Education and Training~~.

(3) The Board may approve pharmacy technician ~~education and~~ training programs which are currently ~~ASHP/ACPE~~ accredited ~~by the American Society of Health System Pharmacists~~, and maintain such accreditation.

(4) The Board may approve pharmacy technician ~~education and~~ training programs not accredited by the ~~American Society of Health System Pharmacists~~ ASHP/ACPE provided:

Formatted: Font: Italic

(A) the program meets ~~the American Society of Health System Pharmacists'~~ ASHP/ACPE Accreditation Standards for Pharmacy Technician Education and Training Programs, modified as follows:

(i) entities providing the pharmacy technician training programs are not required to be health care organizations or academic institutions;

(ii) entities that offer or participate in offering pharmacy technician training programs are not required to be accredited by the Joint Commission on Accreditation of Healthcare Organizations, the American Osteopathic Association, or the National Committee on Quality Assurance; and

(iii) students enrolled in pharmacy technician training programs must have a high school or equivalent diploma, e.g., GED, or they may be currently enrolled in a program which awards such a diploma;

(B) the program:

(i) makes application to the Board;

(ii) provides all information requested by the Board, necessary to confirm that the program meets the requirements outlined in subparagraph (A) of this paragraph;

(iii) assists with any inspections requested by the Board of the facilities, records, and/or programs guidelines necessary to confirm that the program meets the requirements outlined in subparagraph (A) of this paragraph; and

(iv) pays an application processing fee to the Board of \$100.00;

(C) the program director provides written status reports upon request of the Board and at least every three years to assist in evaluation of continued compliance with the requirements; and

(D) the program is subject to an on-site inspection at least every six years.

(5) The Board may require an outside entity to conduct any evaluations and/or inspections of a pharmacy technician training program as outlined in paragraph (4) of this subsection. This outside entity shall report to the Board whether a pharmacy technician training program meets ~~the American Society of Health System Pharmacists'~~ ASHP/ACPE Accreditation Standards for Pharmacy Technician Education and Training Programs as modified. Cost of these evaluations shall be the responsibility of the pharmacy technician training program.

(c) Students enrolled in a Board-approved pharmacy technician training programs. A student enrolled in a Board-approved pharmacy technician training program must be registered as a pharmacy technician trainee or pharmacy technician prior to working in a pharmacy as part of the experiential component of the Board-approved pharmacy technician training program.

(d) Review of accreditation standards. The Board shall review the ~~American Society of Health-System Pharmacists' ASHP/ACPE~~ Accreditation Standard for Pharmacy Technician Education and Training Programs periodically and whenever the Standard is revised.

(e) Listing of Board-approved Pharmacy Technician Training Programs. The Board shall maintain a list of the pharmacy technician training programs approved by the Board and periodically publish this list in the minutes of the Board. If the Board determines that a training program does not meet or no longer meets any of the requirements set forth in this section, the training program will not be listed as a Board-approved pharmacy technician training program.

Accreditation Standards for Pharmacy Technician Education and Training Programs

[VIEW RELATED LINKS](#)

Introduction

These standards have been developed to:

- protect the public,
- serve as a guide for pharmacy technician education and training program development,
- provide criteria for the evaluation of new and established programs, and,
- promote continuous improvement of established programs.

Nothing in the standards shall prevent individual training programs from establishing more stringent requirements than those specified herein. Further, in instances where more stringent requirements have been established or adopted by state law, regulation, or governmental agency, those requirements will take precedence, for the purposes of ASHP/ACPE accreditation of programs, within the corresponding state or jurisdiction.

The importance of academic freedom is recognized by ASHP and ACPE. Therefore, the standards are stated in terms which allow flexibility in the development of an educational program. ASHP and ACPE encourage experimentation, innovation, alternative methods for meeting these standards, organizational individuality, and achievement of excellence in accredited programs.

The roles of pharmacy technicians are evolving and vary according to state and setting. Pharmacy technicians assist and support licensed pharmacists in providing health care and medications to patients. Pharmacy technicians must have a broad knowledge of pharmacy practice and be skilled in the techniques required to order, stock, package, compound, and otherwise prepare medications.

Definition of Terms

In these standards, the following definition of terms will be used:

- “will,” “ shall,” and “must” - an absolute requirement;
- “should” and “may” - a recommended guideline;
- educational goals - broad, general statements of intended learning;
- educational objectives - specific descriptions of what students need to be able to do in observable, measurable terms, the sum of which lead to achievement of the educational goal; and,
- learning activities or instructional strategies - methods employed to enable learners to acquire the knowledge and/or skills defined in educational goals and objectives.

Standard 1: Administration

1.1 Organizational Accreditation

Pharmacy technician education and training programs may be conducted by health care organizations, academic institutions, private organizations, or governmental organizations (e.g., Department of Veterans Affairs, Department of Defense, and Public Health Service). These organizations must be accredited, when applicable, by the appropriate agency or agencies and shall be responsible for ensuring compliance with the requirements for meeting this standard. The technician education and training program shall be subject to similar general administrative control and guidance employed by the organization for other allied health care training programs. The organization conducting the program must provide financial support to the program sufficient to enable the program to achieve its stated goals. The organization must ensure that physical facilities for all parts of the program are appropriate, safe, and sufficient to enable students to meet the programs' educational goals and must allow for confidential meetings between students and faculty.

1.2 Strategic Plan

The program must develop a strategic plan that is reviewed and revised, if appropriate, at least annually. The plan must: reflect the role of the program within the community; include long-term program goals, specific measurable objectives, strategies for achieving the goals and objectives, a schedule for analyzing and evaluating the plan, and progress on the plan; and address program outcomes (e.g., graduation rates)

1.3 Program Director Authority and Responsibility

The program director shall have authority and responsibilities that are commensurate with those of other allied health, technical, or vocational training programs offered by the organization. This individual must have appropriate authority to direct all aspects of training. The program director must have the opportunity to contribute to the development, revision, and selection of qualifications of the applicants for acceptance as trainees.

1.4 Advisory Committee

An advisory committee comprising a broad-based group of pharmacists, faculty, pharmacy technicians, and others as deemed appropriate must be established and meet at least twice a year. The advisory committee must have specific authority for affirming:

- 1.4.a. the curriculum makes possible the attainment of all educational goals and objectives;
- 1.4.b. criteria for experiential training sites;
- 1.4.c. criteria for admission;
- 1.4.d. criteria for successful completion of the program; and,
- 1.4.e. the training program's strategic plan.

1.5 Non-Discriminatory Practice

Reasonable accommodation must be made for students and applicants with disabilities.

1.6 Information about the Program

The organization shall provide applicants with information about:

- 1.6.a. qualifications to enroll;
- 1.6.b. the purpose of the training program;
- 1.6.c. requirements for state registration or licensure as a pharmacy technician;
- 1.6.d. legal restrictions on national and state registration;
- 1.6.e. prospects for employment;
- 1.6.f. realistic salary expectations or referral to local, state, or national statistics for salary expectations;
- 1.6.g. total program cost; and,
- 1.6.h. the program's dismissal policies.

1.7 Records

Records related to the following must be maintained and stored for three years or the time period specified in institutional policy:

- 1.7.a. qualifications of the program director and instructors;
- 1.7.b. training activities that delineate the scope and period of training;
- 1.7.c. activities performed in the didactic, simulated, and experiential segments of the program; and,
- 1.7.d. annual review of the qualifications of the experiential training sites, experiential training site pharmacy services, and the onsite experiential site coordinator.

Standard 2: Program Faculty (Director, Instructors, Experiential Site Coordinators)

2.1 Program Director

- 2.1.a. The program director must be accountable for the overall quality of the program. He/she shall have considerable latitude in delegating instructors' and experiential site coordinators' responsibilities.
- 2.1.b. The program director must:
 - (1) be a licensed pharmacist or a nationally certified pharmacy technician;

- (2) have at least five years of experience in pharmacy practice prior to entering the position;
- (3) adhere to the state's regulations for licensure or registration in the practice of pharmacy; and
- (4) demonstrate on-going continuing education in the field of pharmacy and/or education.
- 2.1.c. If the program director is a pharmacy technician, he/she:
 - (1) should have graduated from an ASHP-accredited pharmacy technician training program; and,
 - (2) must possess or be pursuing actively, with a written plan for achieving, an Associates Degree or an appropriate state teaching credential at a minimum.
- 2.1.d. To stay current with professional issues, the program director must be a member of a national pharmacy or education association and a state pharmacy association. He/she must ensure that memberships in pharmacy and education associations are represented among the program faculty members.
- 2.1.e. The director must ensure that there is a sufficient complement of appropriate program faculty and staff to meet the needs of the program and to enable compliance with the standards.
- 2.1.f. In the simulated portion of the program, the program director must take necessary precautions to ensure an effective and safe level of direct supervision of students.

2.2 Faculty/Instructors

- 2.2.a. Faculty/instructors must have demonstrated expertise in the areas in which they are instructing and adhere to state regulations for licensure or registration to practice as a pharmacist or pharmacy technician. They must have a minimum of three years of experience in the practice setting or area of expertise in which they are teaching.

2.3 Experiential Site Coordinator

- 2.3.a. The experiential site coordinator is the person who works at the experiential site and coordinates or oversees students' activities at the practice site.
- 2.3.b. Experiential site coordinators must have demonstrated contribution and commitment to pharmacy practice and patient care, and have at least three years experience in the type of pharmacy setting for which they are training students.
- 2.3.c. If experiential site coordinators delegate training responsibilities, it must be to an experienced staff member.
- 2.3.d. Experiential site coordinators must act as a liaison between site and the program director to ensure that the student receives the intended educational experience and is evaluated effectively.

Standard 3: Education and Training Program

3.1 Preparation

The curriculum must prepare students for practice as entry-level pharmacy technicians in a variety of contemporary settings (e.g., community, hospital, home care, long-term care) and students must acquire knowledge, skills, and abilities needed for practice.

3.2 Program Currency

The program curriculum must be current.

3.3 Program Length and Composition

- 3.3.a. The training schedule must consist of a minimum of 600 clock hours of health-related education and training, extending over a period of 15 weeks or longer.
- 3.3.b. The period of training must include didactic, simulated, and experiential training.
- 3.3.c. The minimum number of hours for each component is as follows: Didactic - 160 hours; Simulated - 80 hours; Experiential - 160 hours. The remaining hours may be allocated to these three areas as the program director and faculty see fit.
- 3.3.d. Students' experiential activities should be performed in at least two different types of contemporary pharmacy settings, one of which must be a dispensing pharmacy (e.g., hospital, community).
- 3.3.e. Self-paced and hybrid programs must document their method of time calculation for the didactic portion of the program.
- 3.3.f. Didactic
 - The didactic component is that part of the curriculum that does not require a separate simulated or experiential setting. It must progress from more basic to more complex information, concepts, and skills.
- 3.3.g. Simulated
 - (1) The simulated component is defined as practice of skills without impact, or potential for impact, on patients and must occur before the experiential component. The final phase of the simulated component of the program must include observation, feedback, and evaluation by an instructor/faculty member.
 - (2) The simulated component must include sufficient equipment and supplies to realistically simulate an actual work environment.
 - (3) While each skill may be taught in isolation, by the end of the simulated component, students must perform each skill in a sequential manner the way the skill is performed in a pharmacy.
 - (4) The simulated component of the program must be adequate in scope to prepare trainees for practice in a variety of contemporary pharmacy settings.
 - (5) The amount of time each trainee spends in the simulated portion of the program must be documented.
 - (6) The program director must document if they are selecting sterile compounding, non-sterile compounding, or including both exercises as part of the simulation experience when addressing the goals and objectives of the program. (7) Equipment and supplies must be appropriate and sufficient to enable students to achieve the program's educational goals.

- 3.3.h. Experiential
- (1) Experiential sites must be selected by the program director or a qualified pharmacy technician instructor who participates in the pharmacy technician education and training program.
- (2) Experiential training sites must be only in organizations that have sought and accepted outside appraisal of facilities and patient care practices. The external appraisal must be conducted by a recognized organization appropriate to the practice setting.
- (3) The program director or qualified designee (pharmacy technician, pharmacist) must document that each experiential site has proper licensing.
- (4) The program director or qualified designee (pharmacy technician or pharmacist) must determine annually that the site employs properly qualified staff and will provide students with experience in a high-quality pharmacy practice.
- (5) The program director or qualified designee (pharmacy technician or pharmacist) must determine that students will have the opportunity to practice a sufficiently wide range of activities to enable them to prepare for the experiential component of the program.
- (6) The program director or designee must review experiential training sites annually.
- (7) The program director must ensure experiential sites and technician education and training programs have affiliation agreements that are up-to-date.
- (8) The program director and faculty must ensure adequate and appropriate experiential sites for the experiential portion of the program.
- gram.

3.4 Sequence of Instruction

The sequence of activities to transition from simulated to experiential must be:

- 3.4.a. observation (student observes expert performing task);
- 3.4.b. simulation (including observation, feedback, and evaluation by an expert); and,
- 3.4.c. experiential performance under supervision.

3.5 Distance Education

Distance learning programs seeking ASHP/ACPE accreditation must comply with this accreditation standard. In addition, program directors and faculty must make appropriate and effective use of technology to teach the specified objectives. The technology must be readily accessible by students.

3.6 Education and Training Program Goals

- 3.6.a. The education and training program shall be based on the following goals that reflect current and future pharmacy technician functions and responsibilities at the entry-level. While not intended to be prescriptive, the *Model Curriculum for Pharmacy Technician Training*, provides sets of educational objectives identified for achieving each of the goals listed below. In addition, the model curriculum provides guidance for grouping and sequencing instruction. It is recommended as a guide for meeting the standard and for training. This

resource can be obtained from the ASHP website at www.ashp.org/technicians/model_curriculum/index.html. The program director and faculty may add educational goals and objectives that meet current needs of the community and pharmacy profession for pharmacy technician services.

- 3.6.b. Goals
- Personal/Interpersonal Knowledge and Skills
- (1) Demonstrate ethical conduct in all job-related activities.
- (2) Present an image appropriate for the profession of pharmacy in appearance and behavior.
- (3) Communicate clearly when speaking and in writing.
- (4) Demonstrate a respectful attitude when interacting with diverse patient populations.
- (5) Apply self-management skills, including time management, stress management, and adapting to change.
- (6) Apply interpersonal skills, including negotiation skills, conflict resolution, and teamwork.
- (7) Apply critical thinking skills, creativity, and innovation to solve problems.
- Foundational Professional Knowledge and Skills
- (8) Demonstrate understanding of healthcare occupations and the health care delivery system.
- (9) Demonstrate understanding of wellness promotion and disease prevention concepts, such as use of health screenings; health practices and environmental factors that impact health; and adverse effects of alcohol, tobacco, and legal and illegal drugs.
- (10) Demonstrate commitment to excellence in the pharmacy profession and to continuing education and training.
- (11) Demonstrate knowledge and skills in areas of science relevant to the pharmacy technician's role, including anatomy/physiology and pharmacology.
- (12) Perform mathematical calculations essential to the duties of pharmacy technicians in a variety of contemporary settings.
- (13) Demonstrate understanding of the pharmacy technician's role in the medication-use process.
- (14) Demonstrate understanding of major trends, issues, goals, and initiatives taking place in the pharmacy profession.
- (15) Demonstrate understanding of non-traditional roles of pharmacy technicians.
- (16) Identify and describe emerging therapies.
- (17) Demonstrate understanding of the preparation and process for sterile and non-sterile compounding.
- Processing and Handling of Medications and Medication Orders
- (18) Assist pharmacists in collecting, organizing, and recording demographic and clinical information for direct patient care and medication-use review.

- (19) Receive and screen prescriptions/medication orders for completeness, accuracy, and authenticity.
- (20) Assist pharmacists in the identification of patients who desire/require counseling to optimize the use of medications, equipment, and devices.
- (21) Prepare non-patient-specific medications for distribution (e.g., batch, stock medications).
- (22) Distribute medications in a manner that follows specified procedures.
- (23) Practice effective infection control procedures, including preventing transmission of blood borne and airborne diseases.
- (24) Assist pharmacists in preparing, storing, and distributing medication products requiring special handling and documentation [(e.g., controlled substances, immunizations, chemotherapy, investigational drugs, drugs with mandated Risk Evaluation and Mitigation Strategies (REMS)].
- (25) Assist pharmacists in the monitoring of medication therapy.
- (26) Prepare patient-specific medications for distribution.
- (27) Maintain pharmacy facilities and equipment, including automated dispensing equipment.
- (28) Use material safety data sheets (MSDS) to identify, handle, and safely dispose of hazardous materials.
- Sterile and Non-Sterile Compounding
 - (must choose sterile, non-sterile, or both during simulation experience)
 - (29) Prepare medications requiring compounding of sterile products (if selected).
 - (30) Prepare medications requiring compounding of non-sterile products (if selected).
 - (31) Prepare medications requiring compounding of chemotherapy/hazardous products (if selected).
- Procurement, Billing, Reimbursement and Inventory Management
 - (32) Initiate, verify, and assist in the adjudication of billing for pharmacy services and goods, and collect payment for these services.
 - (33) Apply accepted procedures in purchasing pharmaceuticals, devices, and supplies
 - (34) Apply accepted procedures in inventory control of medications, equipment, and devices.
 - (35) Explain pharmacy reimbursement plans for covering pharmacy services.
- Patient- and Medication-Safety
 - (36) Apply patient- and medication-safety practices in all aspects of the pharmacy technician's roles.
 - (37) Verify measurements, preparation, and/or packaging of medications produced by other healthcare professionals (e.g., tech-check-tech).
 - (38) Explain pharmacists' roles when they are responding to emergency situations and how pharmacy technicians can assist pharmacists by being certified as a Basic Life Support (BLS) Healthcare Provider.

- (39) Demonstrate skills required for effective emergency preparedness.
- (40) Assist pharmacists in medication reconciliation.
- (41) Assist pharmacists in medication therapy management.
- Technology and Informatics
- (42) Describe the use of current technology in the healthcare environment to ensure the safety and accuracy of medication dispensing
- Regulatory Issues
- (43) Compare and contrast the roles of pharmacists and pharmacy technicians in ensuring pharmacy department compliance with professional standards and relevant legal, regulatory, formulary, contractual, and safety requirements.
- (44) Maintain confidentiality of patient information.
- Quality Assurance
- (45) Apply quality assurance practices to pharmaceuticals, durable and non-durable medical equipment, devices, and supplies.
- (46) Explain procedures and communication channels to use in the event of a product recall or shortage, a medication error, or identification of another problem.

Standard 4: Students

4.1 Student Recruitment, Acceptance, and Enrollment

- 4.1.a. A policy and process must be documented and provided to student recruitment personnel (staff who enroll prospective students, such as telephone marketers, enrollment advisors, and admissions representatives), that includes guidance to them as follows:
 - (1) prior to the application process, providing prospective applicants complete and accurate information on the total student financial obligation they will incur by participating in the program;
 - (2) prior to enrollment, providing students complete and accurate information about financing options and answering any questions; and,
 - (3) prior to enrollment, informing students that illicit drug use, criminal background checks, and immunization status may prevent future employment as a pharmacy technician, and that externship sites, employers, and State Boards of Pharmacy have regulations about drug use and criminal backgrounds.
- 4.1.b. The organization must establish qualifications that applicants must possess to ensure that they are reasonably likely to be able to achieve the educational goals and objectives of the program.
- 4.1.c. The organization must also determine with reasonable certainty, prior to acceptance of the applicant, that the applicant has proper qualifications to enroll. At a minimum, the student must:
 - (1) be attending high school, possess a high school equivalency certificate, or be a high school graduate;

- (2) have English language proficiency (including reading, writing, and speaking), except in cases where the native language of the country or territory in which the program is taking place is different (e.g., Puerto Rico);
- (3) have math proficiency sufficient to fulfill the requirements of pharmacy technician job responsibilities; and,
- (4) meet the minimum age requirements, which must be based on state requirements for employment of pharmacy technicians.
- 4.1.d. The program must have a documented process to assess students' background pertaining to any illicit drug use and criminal background. This information must be used to make appropriate decisions regarding acceptance.

4.2 Student Identity Verification

Distance learning programs and program-related off-campus activities must verify that a student who registered for distance education or is participating in program-related off-campus activities is the same student attending the clinical experiential portion of the program, receiving credit, and graduating.

Standard 5: Evaluations and Assessments

5.1 Scope and Appropriateness of Students' Evaluation

- 5.1.a. The program director must ensure that students' achievement of educational objectives is evaluated appropriately, to include their knowledge, skills, and abilities leading to entry-level pharmacy technician job competencies.
- 5.1.b. Assessment of students' achievement must occur in each component of the program (didactic, simulated, and experiential).
- (1) If permitted by the program, policies and procedures must be developed and implemented for transfer credit and course waivers.

5.2 Frequency and Relevance of Students' Evaluation Feedback

The program director must ensure that students' evaluation is ongoing, systematic, and assesses students' progress toward meeting the requirements for graduation. Students must receive frequent feedback on their performance that enables them to identify strengths and weaknesses, and gives them direction on how to improve. Evaluations shall be documented and kept on file.

5.3 Post Program Preparation

The program director or designee must provide students with information and resources to prepare them for employer-accepted and nationally recognized certification, registration, and/or licensure.

5.4 Faculty Evaluation

Faculty members, including the program director, instructors, and site coordinators must be evaluated regularly. An evaluation process shall be defined and implemented, and incorporate feedback from students and graduates. In addition, a process for review and use of the information gained from evaluations for continuous improvement must be defined and implemented.

5.5 Program Assessment

The program's staff must conduct regular and ongoing assessments of program effectiveness and use the evaluations for continuous improvement of the program. Measures shall include, but are not limited to:

- 5.5.a. performance on national certification or licensure exams;
- 5.5.b. program completion;
- 5.5.c. program satisfaction, including student, graduate, and employer satisfaction; and,
- 5.5.d. job placement.

Standard 6: Graduation and Certificate

6.1 Conditions for Graduation

The program director must ensure that a process for determining requirements for graduation is documented and implemented.

6.2 Certificate

- 6.2.a. Programs shall recognize those pharmacy technicians who have completed successfully the pharmacy technician training program by awarding an appropriate certificate or diploma.
- 6.2.b. The certificate must be signed by the highest ranking officer of the institution and the program director.
- 6.2.c. Programs must not issue a certificate to an individual who has failed to complete the prescribed program or to meet the intent of this accreditation standard.
- 6.2.d. The certificate must contain the name of the organization, program name and location, student name, completion date, and confirmation that the program is ASHP/ACPE-accredited or in an ASHP/ACPE candidate status.

Approved by the ASHP Board of Directors on October 30, 2015 and the Accreditation Council for Pharmacy Education Board of Directors on November 7, 2015. Developed by the Pharmacy Technician Accreditation Commission. This version supersedes the ASHP Accreditation Standard for Pharmacy Technician Training Programs, approved April 12, 2014 and will be effective January 1, 2016.
