Subject: request for issue consideration by Board of Pharmacy

To Whom It May Concern,

I am writing to ask if the Board has ever considered requiring retail pharmacies to send an electronic message to the prescriber when a prescription is not picked up and they reverse the claim. With electronic communication this seems like the right time for pharmacies to take one more step to be on the health care team.

Please note I am not making this request on behalf of a particular organization.

Thank you so much,

Leslie Dixon, Pharm.D.
Georgetown, TX
