

RULE ANALYSIS

**Introduction: THE AMENDMENTS ARE SUBMITTED TO THE BOARD FOR
CONSIDERATION AS A PROPOSED RULE**

Short Title: Records.

Rule Numbers: §291.34

Statutory Authority: Texas Pharmacy Act, Chapter 551-569, Occupations Code:

- (1) Section 551.002 specifies that the purpose of the Act is to protect the public through the effective control and regulation of the practice of pharmacy; and
- (2) Section 554.051 gives the Board the authority to adopt rules for the proper administration and enforcement of the Act.

Purpose: The amendments, if adopted, extend the time period for a pharmacist to dispense prescription drug orders for Schedule II controlled substances issued by a practitioner in another state to the end of the thirtieth day after the date the prescription is issued to be consistent with federal law and correct a citation reference.

1 **TITLE 22 EXAMINING BOARDS**
2 **PART 15 TEXAS STATE BOARD OF PHARMACY**
3 **CHAPTER 291 PHARMACIES**
4 **SUBCHAPTER B COMMUNITY PHARMACY (CLASS A)**

5 **§291.34. Records.**

6 (a) Maintenance of records.

7 (1) Every inventory or other record required to be kept under the provisions of Subchapter B of
8 this chapter (relating to Community Pharmacy (Class A)) shall be:

9 (A) kept by the pharmacy at the pharmacy's licensed location and be available, for at least
10 two years from the date of such inventory or record, for inspecting and copying by the board or
11 its representative and to other authorized local, state, or federal law enforcement agencies; and

12 (B) supplied by the pharmacy within 72 hours, if requested by an authorized agent of the
13 Texas State Board of Pharmacy. If the pharmacy maintains the records in an electronic format,
14 the requested records must be provided in a mutually agreeable electronic format if specifically
15 requested by the board or its representative. Failure to provide the records set out in this
16 section, either on site or within 72 hours, constitutes *prima facie* evidence of failure to keep and
17 maintain records in violation of the Act.

18 (2) Records of controlled substances listed in Schedule II shall be maintained separately from
19 all other records of the pharmacy.

20 (3) Records of controlled substances, other than prescription drug orders, listed in Schedules
21 III-V shall be maintained separately or readily retrievable from all other records of the pharmacy.
22 For purposes of this subsection, readily retrievable means that the controlled substances shall
23 be asterisked, red-lined, or in some other manner readily identifiable apart from all other items
24 appearing on the record.

25 (4) Records, except when specifically required to be maintained in original or hard copy form,
26 may be maintained in an alternative data retention system, such as a data processing system or
27 direct imaging system provided:

28 (A) the records maintained in the alternative system contain all of the information required on
29 the manual record; and

30 (B) the data processing system is capable of producing a hard copy of the record upon the
31 request of the board, its representative, or other authorized local, state, or federal law
32 enforcement or regulatory agencies.

33 (b) Prescriptions.

34 (1) Professional responsibility.

35 (A) Pharmacists shall exercise sound professional judgment with respect to the accuracy and
36 authenticity of any prescription drug order they dispense. If the pharmacist questions the
37 accuracy or authenticity of a prescription drug order, he/she shall verify the order with the
38 practitioner prior to dispensing.

39 (B) Prior to dispensing a prescription, pharmacists shall determine, in the exercise of sound
40 professional judgment, that the prescription is a valid prescription. A pharmacist may not
41 dispense a prescription drug unless the pharmacist complies with the requirements of §562.056
42 and §562.112 of the Act, and §291.29 of this title (relating to Professional Responsibility of
43 Pharmacists).

44 (C) Subparagraph (B) of this paragraph does not prohibit a pharmacist from dispensing a
45 prescription when a valid patient-practitioner relationship is not present in an emergency
46 situation (e.g., a practitioner taking calls for the patient's regular practitioner).

47 (D) The owner of a Class A pharmacy shall have responsibility for ensuring its agents and
48 employees engage in appropriate decisions regarding dispensing of valid prescriptions as set
49 forth in §562.112 of the Act.

50 (2) Written prescription drug orders.

51 (A) Practitioner's signature.

52 (i) Dangerous drug prescription orders. Written prescription drug orders shall be:

53 (I) manually signed by the practitioner; or

54 (II) electronically signed by the practitioner using a system that electronically replicates the
55 practitioner's manual signature on the written prescription, provided:

56 (a-) that security features of the system require the practitioner to authorize each use;
57 and

58 (b-) the prescription is printed on paper that is designed to prevent unauthorized copying
59 of a completed prescription and to prevent the erasure or modification of information written on
60 the prescription by the prescribing practitioner. (For example, the paper contains security
61 provisions against copying that results in some indication on the copy that it is a copy and
62 therefore render the prescription null and void.)

63 (ii) Controlled substance prescription orders. Prescription drug orders for Schedules II, III,
64 IV, or V controlled substances shall be manually signed by the practitioner. Prescription drug
65 orders for Schedule II controlled substances shall be issued on an official prescription form as
66 required by the Texas Controlled Substances Act, §481.075.

67 (iii) Other provisions for a practitioner's signature.

68 (I) A practitioner may sign a prescription drug order in the same manner as he would sign a
69 check or legal document, e.g., J.H. Smith or John H. Smith.

70 (II) Rubber stamped signatures may not be used.

71 (III) The prescription drug order may not be signed by a practitioner's agent but may be
72 prepared by an agent for the signature of a practitioner. However, the prescribing practitioner is
73 responsible in case the prescription drug order does not conform in all essential respects to the
74 law and regulations.

75 (B) Prescription drug orders written by practitioners in another state.

76 (i) Dangerous drug prescription orders. A pharmacist may dispense prescription drug orders
77 for dangerous drugs issued by practitioners in a state other than Texas in the same manner as
78 prescription drug orders for dangerous drugs issued by practitioners in Texas are dispensed.

79 (ii) Controlled substance prescription drug orders.

80 (I) A pharmacist may dispense prescription drug orders for Schedule II controlled
81 substances issued by a practitioner in another state provided:

82 (-a-) the prescription is dispensed as specified in §315.9 of this title (relating to Pharmacy
83 Responsibility - Out-of-State Practitioner - Effective September 1, 2016);

84 (-b-) the prescription drug order is an original written prescription issued by a person
85 practicing in another state and licensed by another state as a physician, dentist, veterinarian, or
86 podiatrist, who has a current federal Drug Enforcement Administration (DEA) registration
87 number, and who may legally prescribe Schedule II controlled substances in such other state;
88 and

89 (-c-) the prescription drug order is not dispensed after the end of the **thirtieth****[twenty-first]**
90 day after the date on which the prescription is issued.

91 (II) A pharmacist may dispense prescription drug orders for controlled substances in
92 Schedules III, IV, or V issued by a physician, dentist, veterinarian, or podiatrist in another state
93 provided:

94 (-a-) the prescription drug order is issued by a person practicing in another state and
95 licensed by another state as a physician, dentist, veterinarian, or podiatrist, who has a current
96 federal DEA registration number, and who may legally prescribe Schedules III, IV, or V
97 controlled substances in such other state;

98 (-b-) the prescription drug order is not dispensed or refilled more than six months from the
99 initial date of issuance and may not be refilled more than five times; and

100 (-c-) if there are no refill instructions on the original prescription drug order (which shall be
101 interpreted as no refills authorized) or if all refills authorized on the original prescription drug
102 order have been dispensed, a new prescription drug order is obtained from the prescribing
103 practitioner prior to dispensing any additional quantities of controlled substances.

104 (C) Prescription drug orders written by practitioners in the United Mexican States or the
105 Dominion of Canada.

106 (i) Controlled substance prescription drug orders. A pharmacist may not dispense a
107 prescription drug order for a Schedule II, III, IV, or V controlled substance issued by a
108 practitioner in the Dominion of Canada or the United Mexican States.

109 (ii) Dangerous drug prescription drug orders. A pharmacist may dispense a dangerous drug
110 prescription issued by a person licensed in the Dominion of Canada or the United Mexican
111 States as a physician, dentist, veterinarian, or podiatrist provided:

112 (I) the prescription drug order is an original written prescription; and

113 (II) if there are no refill instructions on the original written prescription drug order (which
114 shall be interpreted as no refills authorized) or if all refills authorized on the original written

115 prescription drug order have been dispensed, a new written prescription drug order shall be
116 obtained from the prescribing practitioner prior to dispensing any additional quantities of
117 dangerous drugs.

118 (D) Prescription drug orders issued by an advanced practice registered nurse, physician
119 assistant, or pharmacist.

120 (i) A pharmacist may dispense a prescription drug order that is:

121 (I) issued by an advanced practice registered nurse or physician assistant provided the
122 advanced practice registered nurse or physician assistant is practicing in accordance with
123 Subtitle B, Chapter 157, Occupations Code; and

124 (II) for a dangerous drug and signed by a pharmacist under delegated authority of a
125 physician as specified in Subtitle B, Chapter 157, Occupations Code.

126 (ii) Each practitioner shall designate in writing the name of each advanced practice
127 registered nurse or physician assistant authorized to issue a prescription drug order pursuant to
128 Subtitle B, Chapter 157, Occupations Code. A list of the advanced practice registered nurses or
129 physician assistants designated by the practitioner must be maintained in the practitioner's
130 usual place of business. On request by a pharmacist, a practitioner shall furnish the pharmacist
131 with a copy of the written authorization for a specific advanced practice registered nurse or
132 physician assistant.

133 (E) Prescription drug orders for Schedule II controlled substances. No Schedule II controlled
134 substance may be dispensed without a written prescription drug order of a practitioner on an
135 official prescription form as required by the Texas Controlled Substances Act, §481.075.

136 (3) Oral prescription drug orders.

137 (A) An oral prescription drug order for a controlled substance from a practitioner or a
138 practitioner's designated agent may only be received by a pharmacist or a pharmacist-intern
139 under the direct supervision of a pharmacist.

140 (B) A practitioner shall designate in writing the name of each agent authorized by the
141 practitioner to communicate prescriptions orally for the practitioner. The practitioner shall
142 maintain at the practitioner's usual place of business a list of the designated agents. The
143 practitioner shall provide a pharmacist with a copy of the practitioner's written authorization for a
144 specific agent on the pharmacist's request.

145 (C) A pharmacist may not dispense an oral prescription drug order for a dangerous drug or a
146 controlled substance issued by a practitioner licensed in the Dominion of Canada or the United
147 Mexican States unless the practitioner is also licensed in Texas.

148 (4) Electronic prescription drug orders.

149 (A) Dangerous drug prescription orders.

150 (i) An electronic prescription drug order for a dangerous drug may be transmitted by a
151 practitioner or a practitioner's designated agent:

152 (I) directly to a pharmacy; or

153 (II) through the use of a data communication device provided:

154 (-a-) the confidential prescription information is not altered during transmission; and

155 (-b-) confidential patient information is not accessed or maintained by the operator of the
156 data communication device other than for legal purposes under federal and state law.

157 (ii) A practitioner shall designate in writing the name of each agent authorized by the
158 practitioner to electronically transmit prescriptions for the practitioner. The practitioner shall
159 maintain at the practitioner's usual place of business a list of the designated agents. The
160 practitioner shall provide a pharmacist with a copy of the practitioner's written authorization for a
161 specific agent on the pharmacist's request.

162 (B) Controlled substance prescription orders. A pharmacist may only dispense an electronic
163 prescription drug order for a Schedule II, III, IV, or V controlled substance in compliance with
164 federal and state laws and the rules of the Drug Enforcement Administration outlined in Part
165 1300 of the Code of Federal Regulations.

166 (C) Prescriptions issued by a practitioner licensed in the Dominion of Canada or the United
167 Mexican States. A pharmacist may not dispense an electronic prescription drug order for a
168 dangerous drug or controlled substance issued by a practitioner licensed in the Dominion of
169 Canada or the United Mexican States unless the practitioner is also licensed in Texas.

170 (5) Facsimile (faxed) prescription drug orders.

171 (A) A pharmacist may dispense a prescription drug order for a dangerous drug transmitted to
172 the pharmacy by facsimile.

173 (B) A pharmacist may dispense a prescription drug order for a Schedule III-V controlled
174 substance transmitted to the pharmacy by facsimile provided the prescription is manually signed
175 by the practitioner and not electronically signed using a system that electronically replicates the
176 practitioner's manual signature on the prescription drug order.

177 (C) A pharmacist may not dispense a facsimile prescription drug order for a dangerous drug
178 or controlled substance issued by a practitioner licensed in the Dominion of Canada or the
179 United Mexican States unless the practitioner is also licensed in Texas.

180 (6) Original prescription drug order records.

181 (A) Original prescriptions may be dispensed only in accordance with the prescriber's
182 authorization as indicated on the original prescription drug order, including clarifications to the
183 order given by the practitioner or the practitioner's agent and recorded on the prescription.

184 (B) Notwithstanding subparagraph (A) of this paragraph, a pharmacist may dispense a
185 quantity less than indicated on the original prescription drug order at the request of the patient
186 or patient's agent.

187 (C) Original prescriptions shall be maintained by the pharmacy in numerical order and remain
188 legible for a period of two years from the date of filling or the date of the last refill dispensed.

189 (D) If an original prescription drug order is changed, such prescription order shall be invalid
190 and of no further force and effect; if additional drugs are to be dispensed, a new prescription
191 drug order with a new and separate number is required. However, an original prescription drug

192 order for a dangerous drug may be changed in accordance with paragraph (10) of this
193 subsection relating to accelerated refills.

194 (E) Original prescriptions shall be maintained in three separate files as follows:

195 (i) prescriptions for controlled substances listed in Schedule II;

196 (ii) prescriptions for controlled substances listed in Schedules III-V; and

197 (iii) prescriptions for dangerous drugs and nonprescription drugs.

198 (F) Original prescription records other than prescriptions for Schedule II controlled
199 substances may be stored in a system that is capable of producing a direct image of the original
200 prescription record, e.g., a digitalized imaging system. If original prescription records are stored
201 in a direct imaging system, the following is applicable:

202 (i) the record of refills recorded on the original prescription must also be stored in this
203 system;

204 (ii) the original prescription records must be maintained in numerical order and separated in
205 three files as specified in subparagraph (D) of this paragraph; and

206 (iii) the pharmacy must provide immediate access to equipment necessary to render the
207 records easily readable.

208 (7) Prescription drug order information.

209 (A) All original prescriptions shall bear:

210 (i) the name of the patient, or if such drug is for an animal, the species of such animal and
211 the name of the owner;

212 (ii) the address of the patient; provided, however, that a prescription for a dangerous drug is
213 not required to bear the address of the patient if such address is readily retrievable on another
214 appropriate, uniformly maintained pharmacy record, such as medication records;

215 (iii) the name, address and telephone number of the practitioner at the practitioner's usual
216 place of business, legibly printed or stamped, and if for a controlled substance, the DEA
217 registration number of the practitioner;

218 (iv) the name and strength of the drug prescribed;

219 (v) the quantity prescribed numerically, and if for a controlled substance:

220 (I) numerically, followed by the number written as a word, if the prescription is written;

221 (II) numerically, if the prescription is electronic; or

222 (III) if the prescription is communicated orally or telephonically, as transcribed by the
223 receiving pharmacist;

224 (vi) directions for use;

225 (vii) the intended use for the drug unless the practitioner determines the furnishing of this
226 information is not in the best interest of the patient;

227 (viii) the date of issuance;
228 (ix) if a faxed prescription:
229 (I) a statement that indicates that the prescription has been faxed (e.g., Faxed to); and
230 (II) if transmitted by a designated agent, the name of the designated agent;
231 (x) if electronically transmitted:

232 (I) the date the prescription drug order was electronically transmitted to the pharmacy, if
233 different from the date of issuance of the prescription; and

234 (II) if transmitted by a designated agent, the name of the designated agent; and

235 (xi) if issued by an advanced practice nurse or physician assistant in accordance with
236 Subtitle B, Chapter 157, Occupations Code:

237 (I) the name, address, telephone number, and if the prescription is for a controlled
238 substance, the DEA number of the supervising practitioner; and

239 (II) the address and telephone number of the clinic where the prescription drug order was
240 carried out or signed; and

241 (xii) if communicated orally or telephonically:

242 (I) the initials or identification code of the transcribing pharmacist; and

243 (II) the name of the prescriber or prescriber's agent communicating the prescription
244 information.

245 (B) At the time of dispensing, a pharmacist is responsible for documenting the following
246 information on either the original hardcopy prescription or in the pharmacy's data processing
247 system:

248 (i) the unique identification number of the prescription drug order;

249 (ii) the initials or identification code of the dispensing pharmacist;

250 (iii) the initials or identification code of the pharmacy technician or pharmacy technician
251 trainee performing data entry of the prescription, if applicable;

252 (iv) the quantity dispensed, if different from the quantity prescribed;

253 (v) the date of dispensing, if different from the date of issuance; and

254 (vi) the brand name or manufacturer of the drug or biological product actually dispensed, if
255 the drug was prescribed by generic name or interchangeable biological name or if a drug or
256 interchangeable biological product other than the one prescribed was dispensed pursuant to the
257 provisions of the Act, Chapters 562 and 563.

258 (C) Prescription drug orders may be utilized as authorized in **Title 26, Part 1, Chapter**
259 **554****[Title 40, Part 1, Chapter 19]** of the Texas Administrative Code.

260 (i) A prescription drug order is not required to bear the information specified in subparagraph
261 (A) of this paragraph if the drug is prescribed for administration to an ultimate user who is

262 institutionalized in a licensed health care institution (e.g., nursing home, hospice, hospital). Such
263 prescription drug orders must contain the following information:

264 (I) the full name of the patient;

265 (II) the date of issuance;

266 (III) the name, strength, and dosage form of the drug prescribed;

267 (IV) directions for use; and

268 (V) the signature(s) required by 40 TAC §19.1506.

269 (ii) Prescription drug orders for dangerous drugs shall not be dispensed following one year
270 after the date of issuance unless the authorized prescriber renews the prescription drug order.

271 (iii) Controlled substances shall not be dispensed pursuant to a prescription drug order
272 under this subparagraph.

273 (8) Refills.

274 (A) General information.

275 (i) Refills may be dispensed only in accordance with the prescriber's authorization as
276 indicated on the original prescription drug order except as authorized in paragraph (10) of this
277 subsection relating to accelerated refills.

278 (ii) If there are no refill instructions on the original prescription drug order (which shall be
279 interpreted as no refills authorized) or if all refills authorized on the original prescription drug
280 order have been dispensed, authorization from the prescribing practitioner shall be obtained
281 prior to dispensing any refills and documented as specified in subsection (I) of this section.

282 (B) Refills of prescription drug orders for dangerous drugs or nonprescription drugs.

283 (i) Prescription drug orders for dangerous drugs or nonprescription drugs may not be refilled
284 after one year from the date of issuance of the original prescription drug order.

285 (ii) If one year has expired from the date of issuance of an original prescription drug order for
286 a dangerous drug or nonprescription drug, authorization shall be obtained from the prescribing
287 practitioner prior to dispensing any additional quantities of the drug.

288 (C) Refills of prescription drug orders for Schedules III-V controlled substances.

289 (i) Prescription drug orders for Schedules III-V controlled substances may not be refilled
290 more than five times or after six months from the date of issuance of the original prescription
291 drug order, whichever occurs first.

292 (ii) If a prescription drug order for a Schedule III, IV, or V controlled substance has been
293 refilled a total of five times or if six months have expired from the date of issuance of the original
294 prescription drug order, whichever occurs first, a new and separate prescription drug order shall
295 be obtained from the prescribing practitioner prior to dispensing any additional quantities of
296 controlled substances.

297 (D) Pharmacist unable to contact prescribing practitioner. If a pharmacist is unable to contact
298 the prescribing practitioner after a reasonable effort, a pharmacist may exercise his or her
299 professional judgment in refilling a prescription drug order for a drug, other than a Schedule II
300 controlled substance, without the authorization of the prescribing practitioner, provided:

301 (i) failure to refill the prescription might result in an interruption of a therapeutic regimen or
302 create patient suffering;

303 (ii) the quantity of prescription drug dispensed does not exceed a 72-hour supply;

304 (iii) the pharmacist informs the patient or the patient's agent at the time of dispensing that
305 the refill is being provided without such authorization and that authorization of the practitioner is
306 required for future refills;

307 (iv) the pharmacist informs the practitioner of the emergency refill at the earliest reasonable
308 time;

309 (v) the pharmacist maintains a record of the emergency refill containing the information
310 required to be maintained on a prescription as specified in this subsection;

311 (vi) the pharmacist affixes a label to the dispensing container as specified in §291.33(c)(7) of
312 this title (relating to Operational Standards); and

313 (vii) if the prescription was initially filled at another pharmacy, the pharmacist may exercise
314 his or her professional judgment in refilling the prescription provided:

315 (I) the patient has the prescription container, label, receipt or other documentation from the
316 other pharmacy that contains the essential information;

317 (II) after a reasonable effort, the pharmacist is unable to contact the other pharmacy to
318 transfer the remaining prescription refills or there are no refills remaining on the prescription;

319 (III) the pharmacist, in his or her professional judgment, determines that such a request for
320 an emergency refill is appropriate and meets the requirements of clause (i) of this
321 subparagraph; and

322 (IV) the pharmacist complies with the requirements of clauses (ii) - (vi) of this
323 subparagraph.

324 (E) Natural or man-made disasters. If a natural or man-made disaster has occurred that
325 prohibits the pharmacist from being able to contact the practitioner, a pharmacist may exercise
326 his or her professional judgment in refilling a prescription drug order for a drug, other than a
327 Schedule II controlled substance, without the authorization of the prescribing practitioner,
328 provided:

329 (i) failure to refill the prescription might result in an interruption of a therapeutic regimen or
330 create patient suffering;

331 (ii) the quantity of prescription drug dispensed does not exceed a 30-day supply;

332 (iii) the governor of Texas has declared a state of disaster;

333 (iv) the board, through the executive director, has notified pharmacies that pharmacists may
334 dispense up to a 30-day supply of prescription drugs;

335 (v) the pharmacist informs the patient or the patient's agent at the time of dispensing that the
336 refill is being provided without such authorization and that authorization of the practitioner is
337 required for future refills;

338 (vi) the pharmacist informs the practitioner of the emergency refill at the earliest reasonable
339 time;

340 (vii) the pharmacist maintains a record of the emergency refill containing the information
341 required to be maintained on a prescription as specified in this subsection;

342 (viii) the pharmacist affixes a label to the dispensing container as specified in §291.33(c)(7)
343 of this title; and

344 (ix) if the prescription was initially filled at another pharmacy, the pharmacist may exercise
345 his or her professional judgment in refilling the prescription provided:

346 (I) the patient has the prescription container, label, receipt or other documentation from the
347 other pharmacy that contains the essential information;

348 (II) after a reasonable effort, the pharmacist is unable to contact the other pharmacy to
349 transfer the remaining prescription refills or there are no refills remaining on the prescription;

350 (III) the pharmacist, in his or her professional judgment, determines that such a request for
351 an emergency refill is appropriate and meets the requirements of clause (i) of this
352 subparagraph; and

353 (IV) the pharmacist complies with the requirements of clauses (ii) - (viii) of this
354 subparagraph.

(F) Emergency Refills of Insulin and Insulin-Related Equipment or Supplies.

**(i) A pharmacist may exercise the pharmacist's professional judgment in refilling a
357 prescription for insulin or insulin-related equipment or supplies without the authorization
358 of the prescribing practitioner if the pharmacist:**

(I) is unable to contact the practitioner after reasonable effort;

**(II) is provided with documentation showing that the patient was previously
361 prescribed insulin or insulin-related equipment or supplies by a practitioner;**

(III) assesses the patient to determine whether the emergency refill is appropriate;

**(IV) creates a record that documents the patient's visit that includes a notation
364 describing the documentation provided under subclause (II) of this clause; and**

**(V) makes a reasonable attempt to inform the practitioner of the emergency refill at
366 the earliest reasonable time.**

**(ii) The quantity of an emergency refill of insulin may not exceed a 30-day supply. The
368 quantity of an emergency refill of insulin-related equipment or supplies may not exceed
369 the lesser of a 30-day supply or the smallest available package.**

(G) [F] Auto-Refill Programs. A pharmacy may use a program that automatically refills
371 prescriptions that have existing refills available in order to improve patient compliance with and

372 adherence to prescribed medication therapy. The following is applicable in order to enroll
373 patients into an auto-refill program:

374 (i) Notice of the availability of an auto-refill program shall be given to the patient or patient's
375 agent, and the patient or patient's agent must affirmatively indicate that they wish to enroll in
376 such a program and the pharmacy shall document such indication.

377 (ii) The patient or patient's agent shall have the option to withdraw from such a program at
378 any time.

379 (iii) Auto-refill programs may be used for refills of dangerous drugs, and Schedules IV and V
380 controlled substances. Schedules II and III controlled substances may not be dispensed by an
381 auto-refill program.

382 (iv) As is required for all prescriptions, a drug regimen review shall be completed on all
383 prescriptions filled as a result of the auto-refill program. Special attention shall be noted for drug
384 regimen review warnings of duplication of therapy and all such conflicts shall be resolved with
385 the prescribing practitioner prior to refilling the prescription.

386 (9) Records Relating to Dispensing Errors. If a dispensing error occurs, the following is
387 applicable.

388 (A) Original prescription drug orders:

389 (i) shall not be destroyed and must be maintained in accordance with subsection (a) of this
390 section; and

391 (ii) shall not be altered. Altering includes placing a label or any other item over any of the
392 information on the prescription drug order (e.g., a dispensing tag or label that is affixed to back
393 of a prescription drug order must not be affixed on top of another dispensing tag or label in such
394 a manner as to obliterate the information relating to the error).

395 (B) Prescription drug order records maintained in a data processing system:

396 (i) shall not be deleted and must be maintained in accordance with subsection (a) of this
397 section;

398 (ii) may be changed only in compliance with subsection (e)(2)(B) of this section; and

399 (iii) if the error involved incorrect data entry into the pharmacy's data processing system, this
400 record must be either voided or cancelled in the data processing system, so that the incorrectly
401 entered prescription drug order may not be dispensed, or the data processing system must be
402 capable of maintaining an audit trail showing any changes made to the data in the system.

403 (10) Accelerated refills. In accordance with §562.0545 of the Act, a pharmacist may dispense
404 up to a 90-day supply of a dangerous drug pursuant to a valid prescription that specifies the
405 dispensing of a lesser amount followed by periodic refills of that amount if:

406 (A) the total quantity of dosage units dispensed does not exceed the total quantity of dosage
407 units authorized by the prescriber on the original prescription, including refills;

408 (B) the patient consents to the dispensing of up to a 90-day supply and the physician has
409 been notified electronically or by telephone;

410 (C) the physician has not specified on the prescription that dispensing the prescription in an
411 initial amount followed by periodic refills is medically necessary;

412 (D) the dangerous drug is not a psychotropic drug used to treat mental or psychiatric
413 conditions; and

414 (E) the patient is at least 18 years of age.

415 (c) Patient medication records.

416 (1) A patient medication record system shall be maintained by the pharmacy for patients to
417 whom prescription drug orders are dispensed.

418 (2) The patient medication record system shall provide for the immediate retrieval of
419 information for the previous 12 months that is necessary for the dispensing pharmacist to
420 conduct a prospective drug regimen review at the time a prescription drug order is presented for
421 dispensing.

422 (3) The pharmacist-in-charge shall assure that a reasonable effort is made to obtain and
423 record in the patient medication record at least the following information:

424 (A) full name of the patient for whom the drug is prescribed;

425 (B) address and telephone number of the patient;

426 (C) patient's age or date of birth;

427 (D) patient's gender;

428 (E) any known allergies, drug reactions, idiosyncrasies, and chronic conditions or disease
429 states of the patient and the identity of any other drugs currently being used by the patient which
430 may relate to prospective drug regimen review;

431 (F) pharmacist's comments relevant to the individual's drug therapy, including any other
432 information unique to the specific patient or drug; and

433 (G) a list of all prescription drug orders dispensed (new and refill) to the patient by the
434 pharmacy during the last two years. Such lists shall contain the following information:

435 (i) date dispensed;

436 (ii) name, strength, and quantity of the drug dispensed;

437 (iii) prescribing practitioner's name;

438 (iv) unique identification number of the prescription; and

439 (v) name or initials of the dispensing pharmacists.

440 (4) A patient medication record shall be maintained in the pharmacy for two years. If patient
441 medication records are maintained in a data processing system, all of the information specified
442 in this subsection shall be maintained in a retrievable form for two years and information for the
443 previous 12 months shall be maintained online. A patient medication record must contain
444 documentation of any modification, change, or manipulation to a patient profile.

445 (5) Nothing in this subsection shall be construed as requiring a pharmacist to obtain, record,
446 and maintain patient information other than prescription drug order information when a patient or
447 patient's agent refuses to provide the necessary information for such patient medication
448 records.

449 (d) Prescription drug order records maintained in a manual system.

450 (1) Original prescriptions shall be maintained in three files as specified in subsection (b)(6)(D)
451 of this section.

452 (2) Refills.

453 (A) Each time a prescription drug order is refilled, a record of such refill shall be made:

454 (i) on the back of the prescription by recording the date of dispensing, the written initials or
455 identification code of the dispensing pharmacist, the initials or identification code of the
456 pharmacy technician or pharmacy technician trainee preparing the prescription label, if
457 applicable, and the amount dispensed. (If the pharmacist merely initials and dates the back of
458 the prescription drug order, he or she shall be deemed to have dispensed a refill for the full face
459 amount of the prescription drug order); or

460 (ii) on another appropriate, uniformly maintained, readily retrievable record, such as
461 medication records, that indicates by patient name the following information:

462 (I) unique identification number of the prescription;

463 (II) name and strength of the drug dispensed;

464 (III) date of each dispensing;

465 (IV) quantity dispensed at each dispensing;

466 (V) initials or identification code of the dispensing pharmacist;

467 (VI) initials or identification code of the pharmacy technician or pharmacy technician trainee
468 preparing the prescription label, if applicable; and

469 (VII) total number of refills for the prescription.

470 (B) If refill records are maintained in accordance with subparagraph (A)(ii) of this paragraph,
471 refill records for controlled substances in Schedules III-V shall be maintained separately from
472 refill records of dangerous drugs and nonprescription drugs.

473 (3) Authorization of refills. Practitioner authorization for additional refills of a prescription drug
474 order shall be noted on the original prescription, in addition to the documentation of dispensing
475 the refill as specified in subsection (l) of this section.

476 (4) Each time a modification, change, or manipulation is made to a record of dispensing,
477 documentation of such change shall be recorded on the back of the prescription or on another
478 appropriate, uniformly maintained, readily retrievable record, such as medication records. The
479 documentation of any modification, change, or manipulation to a record of dispensing shall
480 include the identification of the individual responsible for the alteration.

481 (e) Prescription drug order records maintained in a data processing system.

482 (1) General requirements for records maintained in a data processing system.

483 (A) Compliance with data processing system requirements. If a Class A pharmacy's data
484 processing system is not in compliance with this subsection, the pharmacy must maintain a
485 manual record keeping system as specified in subsection (d) of this section.

486 (B) Original prescriptions. Original prescriptions shall be maintained in three files as specified
487 in subsection (b)(6)(D) of this section.

488 (C) Requirements for backup systems.

489 (i) The pharmacy shall maintain a backup copy of information stored in the data processing
490 system using disk, tape, or other electronic backup system and update this backup copy on a
491 regular basis, at least monthly, to assure that data is not lost due to system failure.

492 (ii) Data processing systems shall have a workable (electronic) data retention system that
493 can produce an audit trail of drug usage for the preceding two years as specified in paragraph
494 (2)(H) of this subsection.

495 (D) Change or discontinuance of a data processing system.

496 (i) Records of dispensing. A pharmacy that changes or discontinues use of a data
497 processing system must:

498 (I) transfer the records of dispensing to the new data processing system; or

499 (II) purge the records of dispensing to a printout that contains the same information
500 required on the daily printout as specified in paragraph (2)(C) of this subsection. The information
501 on this hard copy printout shall be sorted and printed by prescription number and list each
502 dispensing for this prescription chronologically.

503 (ii) Other records. A pharmacy that changes or discontinues use of a data processing
504 system must:

505 (I) transfer the records to the new data processing system; or

506 (II) purge the records to a printout that contains all of the information required on the
507 original document.

508 (iii) Maintenance of purged records. Information purged from a data processing system must
509 be maintained by the pharmacy for two years from the date of initial entry into the data
510 processing system.

511 (E) Loss of data. The pharmacist-in-charge shall report to the board in writing any significant
512 loss of information from the data processing system within 10 days of discovery of the loss.

513 (2) Records of dispensing.

514 (A) Each time a prescription drug order is filled or refilled, a record of such dispensing shall
515 be entered into the data processing system.

516 (B) Each time a modification, change or manipulation is made to a record of dispensing,
517 documentation of such change shall be recorded in the data processing system. The
518 documentation of any modification, change, or manipulation to a record of dispensing shall

519 include the identification of the individual responsible for the alteration. Should the data
520 processing system not be able to record a modification, change, or manipulation to a record of
521 dispensing, the information should be clearly documented on the hard copy prescription.

522 (C) The data processing system shall have the capacity to produce a daily hard copy printout
523 of all original prescriptions dispensed and refilled. This hard copy printout shall contain the
524 following information:

525 (i) unique identification number of the prescription;

526 (ii) date of dispensing;

527 (iii) patient name;

528 (iv) prescribing practitioner's name and the supervising physician's name if the prescription
529 was issued by an advanced practice registered nurse, physician assistant or pharmacist;

530 (v) name and strength of the drug product actually dispensed; if generic name, the brand
531 name or manufacturer of drug dispensed;

532 (vi) quantity dispensed;

533 (vii) initials or an identification code of the dispensing pharmacist;

534 (viii) initials or an identification code of the pharmacy technician or pharmacy technician
535 trainee performing data entry of the prescription, if applicable;

536 (ix) if not immediately retrievable via computer display, the following shall also be included
537 on the hard copy printout:

538 (I) patient's address;

539 (II) prescribing practitioner's address;

540 (III) practitioner's DEA registration number, if the prescription drug order is for a controlled
541 substance;

542 (IV) quantity prescribed, if different from the quantity dispensed;

543 (V) date of issuance of the prescription drug order, if different from the date of dispensing;
544 and

545 (VI) total number of refills dispensed to date for that prescription drug order; and

546 (x) any changes made to a record of dispensing.

547 (D) The daily hard copy printout shall be produced within 72 hours of the date on which the
548 prescription drug orders were dispensed and shall be maintained in a separate file at the
549 pharmacy. Records of controlled substances shall be readily retrievable from records of non-
550 controlled substances.

551 (E) Each individual pharmacist who dispenses or refills a prescription drug order shall verify
552 that the data indicated on the daily hard copy printout is correct, by dating and signing such
553 document in the same manner as signing a check or legal document (e.g., J.H. Smith, or John
554 H. Smith) within seven days from the date of dispensing.

555 (F) In lieu of the printout described in subparagraph (C) of this paragraph, the pharmacy shall
556 maintain a log book in which each individual pharmacist using the data processing system shall
557 sign or electronically sign a statement each day, attesting to the fact that the information entered
558 into the data processing system that day has been reviewed by him or her and is correct as
559 entered. Such log book shall be maintained at the pharmacy employing such a system for a
560 period of two years after the date of dispensing; provided, however, that the data processing
561 system can produce the hard copy printout on demand by an authorized agent of the Texas
562 State Board of Pharmacy. If no printer is available on site, the hard copy printout shall be
563 available within 72 hours with a certification by the individual providing the printout, stating that
564 the printout is true and correct as of the date of entry and such information has not been altered,
565 amended, or modified.

566 (G) The pharmacist-in-charge is responsible for the proper maintenance of such records, for
567 ensuring that such data processing system can produce the records outlined in this section, and
568 that such system is in compliance with this subsection.

569 (H) The data processing system shall be capable of producing a hard copy printout of an
570 audit trail for all dispensing (original and refill) of any specified strength and dosage form of a
571 drug (by either brand or generic name or both) during a specified time period.

572 (i) Such audit trail shall contain all of the information required on the daily printout as set out
573 in subparagraph (C) of this paragraph.

574 (ii) The audit trail required in this subparagraph shall be supplied by the pharmacy within 72
575 hours, if requested by an authorized agent of the Texas State Board of Pharmacy.

576 (I) Failure to provide the records set out in this subsection, either on site or within 72 hours,
577 constitutes prima facie evidence of failure to keep and maintain records in violation of the Act.

578 (J) The data processing system shall provide online retrieval (via computer display or hard
579 copy printout) of the information set out in subparagraph (C) of this paragraph of:

580 (i) the original controlled substance prescription drug orders currently authorized for refilling;
581 and

582 (ii) the current refill history for Schedules III, IV, and V controlled substances for the
583 immediately preceding six-month period.

584 (K) In the event that a pharmacy using a data processing system experiences system
585 downtime, the following is applicable:

586 (i) an auxiliary procedure shall ensure that refills are authorized by the original prescription
587 drug order and that the maximum number of refills has not been exceeded, or authorization
588 from the prescribing practitioner shall be obtained prior to dispensing a refill; and

589 (ii) all of the appropriate data shall be retained for online data entry as soon as the system is
590 available for use again.

591 (3) Authorization of refills. Practitioner authorization for additional refills of a prescription drug
592 order shall be noted as follows:

593 (A) on the hard copy prescription drug order;

594 (B) on the daily hard copy printout; or
595 (C) via the computer display.

596 (f) Limitation to one type of recordkeeping system. When filing prescription drug order
597 information a pharmacy may use only one of the two systems described in subsection (d) or (e)
598 of this section.

599 (g) Transfer of prescription drug order information. For the purpose of initial or refill dispensing,
600 the transfer of original prescription drug order information is permissible between pharmacies,
601 subject to the following requirements:

602 (1) The transfer of original prescription drug order information for controlled substances listed
603 in Schedules III, IV, or V for the purpose of refill dispensing is permissible between pharmacies
604 on a one-time basis only. However, pharmacies electronically sharing a real-time, online
605 database may transfer up to the maximum refills permitted by law and the prescriber's
606 authorization.

607 (2) The transfer of original prescription drug order information for dangerous drugs is
608 permissible between pharmacies without limitation up to the number of originally authorized
609 refills.

610 (3) The transfer is communicated orally by telephone or via facsimile:

611 (A) directly by a pharmacist or pharmacist-intern to another pharmacist or pharmacist-intern
612 for prescription drug order information for controlled substances; or

613 (B) directly by a pharmacist, pharmacist-intern, or pharmacy technician to another
614 pharmacist, pharmacist-intern, or pharmacy technician for prescription drug order information for
615 dangerous drugs.

616 (4) Both the original and the transferred prescription drug orders are maintained for a period of
617 two years from the date of last refill.

618 (5) The individual transferring the prescription drug order information shall:

619 (A) write the word "void" on the face of the invalidated prescription or the prescription is
620 voided in the data processing system;

621 (B) record the name, address, and if for a controlled substance, the DEA registration number
622 of the pharmacy to which it was transferred, and the name of the receiving individual on the
623 reverse of the invalidated prescription or stored with the invalidated prescription drug order in
624 the data processing system;

625 (C) record the date of the transfer and the name of the individual transferring the information;
626 and

627 (D) if the prescription is transferred electronically, provide the following information:

628 (i) date of original dispensing and prescription number;

629 (ii) number of refills remaining and if a controlled substance, the date(s) and location(s) of
630 previous refills;

631 (iii) name, address, and if a controlled substance, the DEA registration number of the
632 transferring pharmacy;

633 (iv) name of the individual transferring the prescription; and

634 (v) if a controlled substance, the name, address, DEA registration number, and prescription
635 number from the pharmacy that originally dispensed the prescription, if different.

636 (6) The individual receiving the transferred prescription drug order information shall:

637 (A) write the word "transfer" on the face of the prescription or indicate in the prescription
638 record that the prescription was a transfer; and

639 (B) reduce to writing all of the information required to be on a prescription as specified in
640 subsection (b)(7) of this section, and the following:

641 (i) date of issuance and prescription number;

642 (ii) original number of refills authorized on the original prescription drug order;

643 (iii) date of original dispensing;

644 (iv) number of valid refills remaining, and if a controlled substance, the date(s) and
645 location(s) of previous refills;

646 (v) name, address, and if for a controlled substance, the DEA registration number of the
647 transferring pharmacy;

648 (vi) name of the individual transferring the prescription; and

649 (vii) name, address, and if for a controlled substance, the DEA registration number, of the
650 pharmacy that originally dispensed the prescription, if different; or

651 (C) if the prescription is transferred electronically, create an electronic record for the
652 prescription that includes the receiving pharmacist's name and all of the information transferred
653 with the prescription including all of the information required to be on a prescription as specified
654 in subsection (b)(7) of this section, and the following:

655 (i) date of original dispensing;

656 (ii) number of refills remaining and if a controlled substance, the prescription number(s),
657 date(s) and location(s) of previous refills;

658 (iii) name, address, and if for a controlled substance, the DEA registration number;

659 (iv) name of the individual transferring the prescription; and

660 (v) name, address, and if for a controlled substance, the DEA registration number, of the
661 pharmacy that originally filled the prescription.

662 (7) Both the individual transferring the prescription and the individual receiving the prescription
663 must engage in confirmation of the prescription information by such means as:

664 (A) the transferring individual faxes the hard copy prescription to the receiving individual; or

665 (B) the receiving individual repeats the verbal information from the transferring individual and
666 the transferring individual verbally confirms that the repeated information is correct.

667 (8) Pharmacies transferring prescriptions electronically shall comply with the following:

668 (A) Prescription drug orders may not be transferred by non-electronic means during periods
669 of downtime except on consultation with and authorization by a prescribing practitioner;
670 provided, however, that during downtime, a hard copy of a prescription drug order may be made
671 available for informational purposes only, to the patient or a pharmacist, and the prescription
672 may be read to a pharmacist by telephone;

673 (B) The original prescription drug order shall be invalidated in the data processing system for
674 purposes of filling or refilling, but shall be maintained in the data processing system for refill
675 history purposes;

676 (C) If the data processing system does not have the capacity to store all the information as
677 specified in paragraphs (5) and (6) of this subsection, the pharmacist is required to record this
678 information on the original or transferred prescription drug order;

679 (D) The data processing system shall have a mechanism to prohibit the transfer or refilling of
680 controlled substance prescription drug orders that have been previously transferred; and

681 (E) Pharmacies electronically accessing the same prescription drug order records may
682 electronically transfer prescription information if the following requirements are met:

683 (i) The original prescription is voided and the pharmacies' data processing systems store all
684 the information as specified in paragraphs (5) and (6) of this subsection;

685 (ii) Pharmacies not owned by the same entity may electronically access the same
686 prescription drug order records, provided the owner, chief executive officer, or designee of each
687 pharmacy signs an agreement allowing access to such prescription drug order records; and

688 (iii) An electronic transfer between pharmacies may be initiated by a pharmacist intern,
689 pharmacy technician, or pharmacy technician trainee acting under the direct supervision of a
690 pharmacist.

691 (9) An individual may not refuse to transfer original prescription information to another
692 individual who is acting on behalf of a patient and who is making a request for this information
693 as specified in this subsection. The transfer of original prescription information must be
694 completed within four business hours of the request.

695 (10) When transferring a compounded prescription, a pharmacy is required to provide all of the
696 information regarding the compounded preparation, including the formula, unless the formula is
697 patented or otherwise protected, in which case, the transferring pharmacy shall, at a minimum,
698 provide the quantity or strength of all of the active ingredients of the compounded preparation.

699 (11) The electronic transfer of multiple or bulk prescription records between two pharmacies is
700 permitted provided:

701 (A) a record of the transfer as specified in paragraph (5) of this subsection is maintained by
702 the transferring pharmacy;

703 (B) the information specified in paragraph (6) of this subsection is maintained by the receiving
704 pharmacy; and

705 (C) in the event that the patient or patient's agent is unaware of the transfer of the
706 prescription drug order record, the transferring pharmacy must notify the patient or patient's
707 agent of the transfer and must provide the patient or patient's agent with the telephone number
708 of the pharmacy receiving the multiple or bulk prescription drug order records.

709 (h) Distribution of controlled substances to another registrant. A pharmacy may distribute
710 controlled substances to a practitioner, another pharmacy, or other registrant, without being
711 registered to distribute, under the following conditions.

712 (1) The registrant to whom the controlled substance is to be distributed is registered under the
713 Controlled Substances Act to dispense that controlled substance.

714 (2) The total number of dosage units of controlled substances distributed by a pharmacy may
715 not exceed 5.0% of all controlled substances dispensed and distributed by the pharmacy during
716 the 12-month period in which the pharmacy is registered; if at any time it does exceed 5.0%, the
717 pharmacy is required to obtain an additional registration to distribute controlled substances.

718 (3) If the distribution is for a Schedule III, IV, or V controlled substance, a record shall be
719 maintained that indicates:

720 (A) the actual date of distribution;

721 (B) the name, strength, and quantity of controlled substances distributed;

722 (C) the name, address, and DEA registration number of the distributing pharmacy; and

723 (D) the name, address, and DEA registration number of the pharmacy, practitioner, or other
724 registrant to whom the controlled substances are distributed.

725 (4) A pharmacy shall comply with 21 CFR 1305 regarding the DEA order form (DEA 222)
726 requirements when distributing a Schedule II controlled substance.

727 (i) Other records. Other records to be maintained by a pharmacy:

728 (1) a log of the initials or identification codes that will identify each pharmacist, pharmacy
729 technician, and pharmacy technician trainee who is involved in the dispensing process, in the
730 pharmacy's data processing system (the initials or identification code shall be unique to ensure
731 that each individual can be identified, i.e., identical initials or identification codes shall not be
732 used). Such log shall be maintained at the pharmacy for at least seven years from the date of
733 the transaction;

734 (2) suppliers' invoices of dangerous drugs and controlled substances; a pharmacist shall verify
735 that the controlled substances listed on the invoices were actually received by clearly recording
736 his/her initials and the actual date of receipt of the controlled substances;

737 (3) suppliers' credit memos for controlled substances and dangerous drugs;

738 (4) a copy of inventories required by §291.17 of this title (relating to Inventory Requirements);

739 (5) reports of surrender or destruction of controlled substances and/or dangerous drugs to an
740 appropriate state or federal agency;

741 (6) records of distribution of controlled substances and/or dangerous drugs to other
742 pharmacies, practitioners, or registrants; and

743 (7) a copy of any notification required by the Texas Pharmacy Act or the sections in this
744 chapter, including, but not limited to, the following:

745 (A) reports of theft or significant loss of controlled substances to the DEA and the board;

746 (B) notifications of a change in pharmacist-in-charge of a pharmacy; and

747 (C) reports of a fire or other disaster that may affect the strength, purity, or labeling of drugs,
748 medications, devices, or other materials used in the diagnosis or treatment of injury, illness, and
749 disease.

750 (j) Permission to maintain central records. Any pharmacy that uses a centralized recordkeeping
751 system for invoices and financial data shall comply with the following procedures.

752 (1) Controlled substance records. Invoices and financial data for controlled substances may be
753 maintained at a central location provided the following conditions are met:

754 (A) Prior to the initiation of central recordkeeping, the pharmacy submits written notification by
755 registered or certified mail to the divisional director of the Drug Enforcement Administration as
756 required by Title 21, Code of Federal Regulations, §1304.04(a), and submits a copy of this
757 written notification to the board. Unless the registrant is informed by the divisional director of the
758 Drug Enforcement Administration that permission to keep central records is denied, the
759 pharmacy may maintain central records commencing 14 days after receipt of notification by the
760 divisional director;

761 (B) The pharmacy maintains a copy of the notification required in subparagraph (A) of this
762 paragraph; and

763 (C) The records to be maintained at the central record location shall not include executed
764 DEA order forms, prescription drug orders, or controlled substance inventories that shall be
765 maintained at the pharmacy;

766 (2) Dangerous drug records. Invoices and financial data for dangerous drugs may be
767 maintained at a central location;

768 (3) Access to records. If the records are kept on microfilm, computer media, or in any form
769 requiring special equipment to render the records easily readable, the pharmacy shall provide
770 access to such equipment with the records; and

771 (4) Delivery of records. The pharmacy agrees to deliver all or any part of such records to the
772 pharmacy location within two business days of written request of a board agent or any other
773 authorized official.

774 (k) Ownership of pharmacy records. For the purposes of these sections, a pharmacy licensed
775 under the Act is the only entity that may legally own and maintain prescription drug records.

776 (l) Documentation of consultation. When a pharmacist, pharmacist-intern, or pharmacy
777 technician consults a prescriber as described in this section, the individual shall document such
778 occurrences on the hard copy or in the pharmacy's data processing system associated with the
779 prescription and shall include the following information:

780 (1) date the prescriber was consulted;

781 (2) name of the person communicating the prescriber's instructions;

782 (3) any applicable information pertaining to the consultation; and

783 (4) initials or identification code of the pharmacist, pharmacist-intern, or pharmacy technician
784 performing the consultation clearly recorded for the purpose of identifying the individual who
785 performed the consultation if the information is recorded on the hard copy prescription.
