

On September 1, 2016, the Texas State Board of Pharmacy will be implementing Appriss' Prescription Drug Monitoring Solution, PMP AWAREx. We are working together to ensure a seamless transition with a minimal impact to end users throughout the migration process.

In anticipation of the implementation, please see the below examples of what the new user interface will look like in AWAREx. As AWAREx has the fastest response times in the industry, you will receive the same information you are accustomed to in a more rapid timeframe, along with monthly system improvements to ensure the best experience.

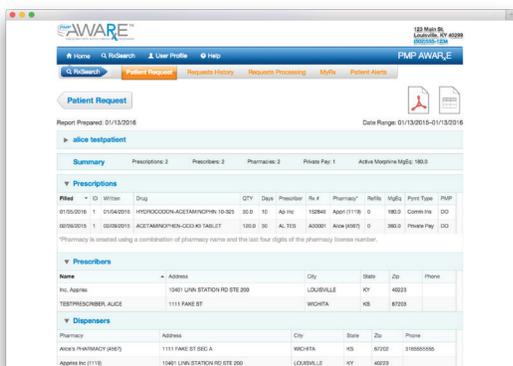

## Prescriber-Oriented Dashboard

- Patient-Centered Alerts
- Recent Request History
- Delegate Activity
- Prescriber-Specific Announcements

## PMP Patient Report Request

- Clean Interface
- Easily Accessible Tutorial
- Seamless Integration of Interstate Data Sharing

## PMP Patient Request Results

In-line (and Exportable) PMP Report provides:

- Prescription History
- Prescriber and Dispenser Information
- Summary Information, Including Active MME
